2617 Tracewood Circle, Henrico VA, 23233 • Fhidalgo2065@gmail.com • (646) 842-9488

### PROFESSIONAL EXPERIENCE

#### Capital One

Senior Associate - Software Engineer

Richmond, VA

November 2018 – Present

#### Think Of Us

Sr. Front End Engineer

Richmond, VA

March 2018 – November 2018

- Lead the migration of the current web app from using knockout with .Net MVC to a more modern front end stack leveraging Angular v6+, Sass, NPM and webpack while still integrating with .Net MVC allowing for a smooth transition
- Made improvements to existing API's to accommodate new features & decouple from the UI
- Trained and mentored the other developers on the team to ensure that best practices and clean code principles were being upheld

#### Goldman Sachs

Software Engineer - Associate

New York, NY

February 2014 – March 2018

- Took a full stack approach to implement frameworks and build applications to meet growing performance and functional needs of our compliance user base, while leveraging newer technology frameworks (AngularJs, Elasticsearch, Microservices...etc)
- Developed two critical applications that provide users with aggregated metrics of key data points for all entities across the firm. Along with a more individualized view of a single entity and their various touch points/ transactions with the firm
- Mentored interns during their 10 week summer internship for two years in a row

#### Goldman Sachs

Software Engineer - Intern

New York, NY

May 2013 – August 2013

- Leveraged JCE library, SLF4J and other enterprise level development tools as part of the core development team within compliance to improve maintainability and increase security measures of current applications

#### Advise Technology

Software Engineer - Intern

New York, NY

January 2013 – May 2013

- Developed a WPF application using the MVVM design pattern to allow users to select items from a tree of features ultimately to be used to configure the licensing/ pricing of the product

### PROJECTS

#### Where's The Word

Developer

January 2013 – May 2013

- Worked in a three person team to develop a Word Search Game for iPhone with multiplayer capabilities. Leveraged Objective-C, Xcode, Game Center API's along with other apple frameworks.

### LEADERSHIP & AFFILIATIONS
